

MACK®

REMACK®

No shortcuts.
REMACK parts are
fully remanufactured
to go the distance.

Count on REMACK parts for the 100% Mack quality you need to keep your operation running smoothly. With like-new performance at an affordable price, REMACK components deliver Mack reliability for your trucks—and a better bottom line for your business.

The REMACK inventory covers a broad range of parts from engines and transmissions to coolant pumps and turbo chargers. All built to strict Mack standards and backed by our parts warranty. There's no better way to retain the 100% OEM quality your Mack fleet deserves.

You can trust REMACK parts.
Here's why.

REMACK components are fully remanufactured from top to bottom using Mack factory-specified technologies and processes. The result is a Mack genuine replacement part that's tested and proven for performance, dependability, and longevity—with the added advantage of substantial cost savings.

Pure Mack Reman Parts.
Remade to Mack standards.

A Process Guided by OEM Technology.

- Core parts are inspected and cleaned using the latest techniques.
- Components are remanufactured to exact Mack OEM/REMACK specs.
- Remanufacturing incorporates the latest engineering updates.
- CNC computer-controlled machining ensures precision tolerances.

Quality Control Means Confidence
On The Road.

- Only the best Mack original core materials are selected.
- All parts undergo a strict evaluation process.
- Finished products are thoroughly tested for performance, reliability, and longevity.

Extensive Range of Ready-to-Order
Components.

- REMACK maintains one of the most extensive inventories in the industry.
- Your Mack dealer offers expert advice and fast access to the parts you need.
- Dealer locations coast to coast assure parts and service are always available.

Warranty Coverage You Can Count On.

- The REMACK North America warranty covers 100% parts and contingent damage.
- Labor is 100% covered when installed by an authorized Mack Dealer.

Better For The Environment.

- Remanufacturing supports sustainability and a reduced carbon footprint.
- The reman process uses up to 85% less material, and 80% less energy than new production.

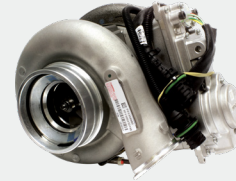

100% Mack quality. 100% Mack pure.

REMAK products are driven by Mack's commitment to quality. Every component is remanufactured to exact Mack OEM specs. Our factory-trained technicians use only Pure Mack Parts® to ensure your vehicle's performance and protect its value.

1 Year / Unlimited Miles

CYLINDER HEADS
Castings are Magnaflux® inspected and pressure tested. Includes new valve guides and rotors. Valves and seats are CNC machined to precise OEM specs and tested for proper seal.

TURBOS
Units are disassembled, cleaned, and inspected. Any parts not up to Mack specs are replaced with genuine new. Testing follows the strict process used in new production.

BASIC ENGINES
New and reman parts combine for optimum performance, reliability, and longevity. Includes reman cylinder block, cylinder head, crankshaft, connecting rods, oil pump and more.
| 2 Years / Unlimited Miles

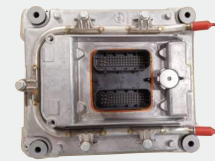

INJECTORS
Completely disassembled, cleaned, inspected, and tested to original OEM specs. Critical and high-wear components are replaced with 100% new Pure Mack parts.

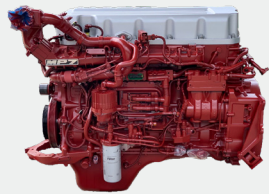

EGR VALVES
Valves are disassembled and cleaned using the latest technology. All critical components are replaced with new, including control valve, piston assembly, O-rings, and seals.

COOLANT PUMPS
Updated to the latest engineering high-flow designs. Complete with impeller, gear and O-ring/gaskets. Bearings and seals are replaced with 100% new Pure Mack parts.

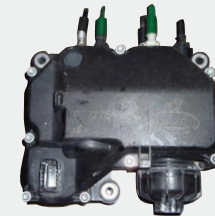

ENGINE CONTROL UNITS
Units are cleaned and inspected for visual damage. Old data files are deleted. After thorough testing, modules are remanufactured and updated to latest engineering specs.

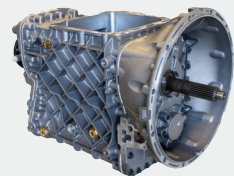

7/8 ENGINES
Completely disassembled, cleaned, and remanufactured using 100% Pure Mack components. Dyno-tested and ready to install, with installation time savings of 1-3 days.
| 2 Years / Unlimited Miles

CONNECTING RODS
Magnaglo inspected for ultra-fine cracks, CNC machined to ensure quality and proper surface finish. Crank bores and wrist pin bushings are restored to original size.

DEF PUMPS
Disassembled and cleaned using the latest technology. Components must pass rigorous inspections to meet Mack standards. Critical, high wear items are replaced with new.

mDRIVE® Transmission
Available in three service configurations, each mDRIVE® solution is built using only Mack parts and remanufactured by Mack-certified technicians.
| 1 or 2 Years / Unlimited Miles

FLYWHEELS
Reman flywheels are a proven option that reduces mDRIVE® service cost. Each is cleaned, inspected, and remanufactured according to the latest engineering specifications.

More options, less downtime. REMACK makes it easy.

REMAK is your best route for getting trucks back on the job quickly and affordably. You'll have multiple options for components and assemblies, all available through our parts and service network. No matter where you are, there's always a Mack dealer up ahead. Contact the one near you to learn more.
