

WHY REMACK®?

ONLY THE BEST

Before a part is requalified, it undergoes a stringent quality control process. We look for signs of wear, hairline cracks or any other flaws that could affect performance. Only the best parts are selected for remanufacturing.

UNSURPASSED QUALITY CONTROL

Each component is completely disassembled, cleaned and inspected by REMACK Certified Technicians. Each part undergoes state-of-the-art crack detection and is precision machined where specified.

REMAK products are remanufactured using the most advanced recovery techniques. Our technicians reassemble components that have passed our stringent cleaning and remanufacturing process, and install new bearings, gaskets, seals and o-rings.

IT'S NOT READY UNTIL IT'S READY

All finished parts are subjected to calibration controls to ensure the correct torque specs are met. Assemblies are tested to be sure they meet Mack's standards.

A LIKE-NEW APPEARANCE

Precision painting ensures flanges, shafts and threads remain paint-free.

OPTIONS FOR EVERY OWNER

The Rebuilder Series™ product line gives you the quality of a factory unit at a more affordable price for cost-conscious 2nd, 3rd and 4th owners.

REMAK® PRODUCTS

TRADITION, RELIABILITY AND DURABILITY

BORN READY.

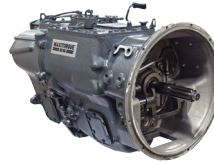

WE DON'T CUT CORNERS

You can be sure every REMACK® component is remanufactured to meet the exacting standards America's Mack® truck tradition created.
